

Concordance®

IMPROVE YOUR DISCOVERY, STRENGTHEN YOUR CASE

In the age of e-discovery, law professionals often sift through years of discovery data involving hundreds of thousands of records, resulting in exorbitant litigation costs.

Concordance® discovery management software enables your team to mitigate risk, control costs and collaborate with outside counsel as you manage and review the high volume of documents generated during litigation. More corporate attorneys use Concordance for internal work—and to stay in sync with outside counsel—since Concordance is used by 92 percent of the AmLaw 200®.

The Concordance software allows you to search, review, organize, produce and share litigation documents—scanned paper, email and other e-discovery—generated during discovery. Whether you access documents from your desktop, a laptop or the Web, Concordance delivers award-winning, industry-leading features that turn discovery as you know it into discovery as you want it to be.

Reduce Costs and Accomplish More

Concordance helps law professionals cut document review costs by up to 50 percent. More AmLaw 200 firms, government agencies and corporations rely on Concordance than any other litigation management software. Use Concordance to:

- Search, review, organize and share
- Organize Document Responses
- Review Foreign Language Documents
- Manage Email and Electronic Documents
- Maximize Scanned OCR Text
- Access Information from Anywhere
- Share Data with Other Industry-leading Applications
- And Much More

The latest version of Concordance helps you accomplish more:

- Work with documents in various languages including Chinese, Russian, Arabic and more with Unicode support.
- *Enhancement!* Speed native file review by more than 100 percent with E.L. Native Review for Concordance®, a stand-alone platform developed in an alliance with Electronic Legal Software LLC. The viewer is synchronized with Concordance navigation. Open all native files in the same window, enter notes in the native viewer window and save time by mapping tags to F1 – F12 keys (an optional, integrated third-party addition).

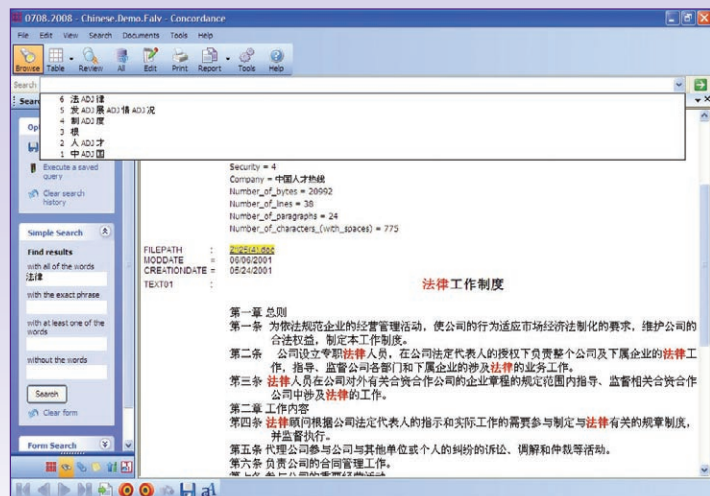

Fast Document Searching

Concordance software includes one of the most powerful and intuitive search engines in litigation, so you can pinpoint key evidence with confidence:

- With Simple Search technology, you can locate key documents or hard-to-find evidence and quickly find any word, phrase, date, email address or document type.
- Perform Boolean, fuzzy, wild card and relational searches, as well as concept searches that are available with third-party integration.
- Save and re-run searches on up to 128 databases simultaneously.
- Pinpoint hard-to-find evidence using advanced search techniques and a simple fill-in-the-blank form.
- Transform jumbled, misspelled OCR and coded text into valuable, searchable data with the innovative Synonym Builder.

Foreign Character Language Support

- *Expanded Capability!* Take on multinational cases with Unicode foreign character language support. Easily work with documents in Chinese, Russian, Japanese, Arabic, Korean and Greek, as well as the European languages that Concordance discovery management software has long supported.

Search and review a multitude of foreign languages.

Collaborative Case Analysis and Organization

A highly intuitive user interface delivers easy navigation, resulting in greater efficiency and improved case organization:

- Single search, review, annotation and organization save time as they are all done in one screen.
- Statistics allow you to easily manage the preview process and see when changes were made to document tags (e.g., additions, deletions) and by whom.
- Multi-level subject foldering allows users to organize their tags in hierarchical groups for ease of review and categorization by public or private.

Streamlined E-Discovery

Import, search and organize email and other electronic documents quickly and accurately:

- Send scanned paper documents and electronically processed files directly from LAW PreDiscovery™ to Concordance for more detailed review.
- Email and Document Wizard makes it simple to import e-documents, and to keep original formatting, metadata, hyperlinks to native documents, and parent-child relationships between email and their attachments.

Flexible Reporting

Produce formatted, customized reports for fact review and trial preparation:

- Report Wizard creates numerous reports—privilege logs, Q&A sets, annotations, production history reports and more.

Large Capacity

Sizable database capacity makes importing and managing volumes of electronic data and scanned OCR text pain free:

- Concordance accommodates 12 megabytes of data (approximately four copies of Tolstoy's *War and Peace*) per field.
- It handles over 33 million records per database and can search over 4 billion records at one time.

FYI™ Extends the Power & Reach of Concordance

Concordance FYI is designed to extend the powerful functionality of Concordance and Concordance® Image software beyond the desktop and onto the Web. FYI maximizes the flexibility of the Internet without sacrificing performance or functionality:

- Same Environment, No Learning Curve: Authorized users can access a remote database as easily as if it were stored on their PC or local network.
- Easy Setup and Administration: FYI software is maintained from a central server location. There's no need to configure individual desktops.
- Increased Collaboration: Remote offices, co-counsel, clients and expert witnesses can collaborate and review evidence in real time without sacrificing the integrity of case data.
- State-of-the-art Security: Case data is fully protected while being shared internally and externally.

The Discovery Experts: Litigation Management

The suite of Discovery Services products from LexisNexis brings together all the elements you need to succeed in litigation. Corporations, law firms and government agencies rely on LexisNexis® to help them meet their discovery obligations on time, accurately and cost-effectively. The Concordance product line provides one of the most powerful, effective ways to manage litigation documents. With Concordance, it's easy to identify, organize and analyze case-critical information so you can collaborate and share data—across an organization or around the world.
