

Why Choose LMG?

LMG Group LLC is an international organization that utilizes and develops the most up-to-date software technologies to manage complex litigations, government inquiries, corporate investigations, mergers, and acquisitions. LMG was launched in 1999 and brings a decade of unparalleled and unique consulting, management, and technology solutions. We utilize our various business groups to bring efficient solutions to our clients.

Our portfolio of solutions includes litigation consulting, project management, identification of data, forensic collection of data, electronic processing of data, and document review and hosting solutions. Our domestic and international presence paired with our dedication to excellence and technological advancements has made LMG a leading provider of litigation support services worldwide. We guarantee unparalleled levels of service, quality, and professionalism. Our mission is to offer and guarantee quality, service, and flexibility unmatched in today's rapidly changing business world.

Data Reduction Solution

Our Data Reduction Solution is a customizable pre-processing tool that streamlines the processing and analysis stages of the electronic discovery model. LMG's Data Reduction Solution removes irrelevant and redundant data prior to processing. Our Project Managers collaborate with programmers to create a case specific Data Reduction Solution for your matter. By combining technologies, our programmers develop the most efficient strategy to reduce and filter data. Culling of irrelevant data is performed upon date range, file type, file size, or strong (signature) filtering.

This preliminary culling of data ensures clients will not pay unnecessary data processing costs. Data Reduction also provides greater efficiencies within the processing solution, defensible iterative early case assessments, and elimination of unnecessary attorney billable hours. LMG will process all collected data with forensically proven software to eliminate the amount of data which will need to be processed, resulting in:

- » Streamlined workflow
- » Eliminating irrelevant data
- » Defensible data reduction technologies
- » Customizable filtering and culling
- » Reduction in costs associated with processing
- » Acceleration of early case assessments
- » Reduction of attorney billable hours.

Cost Savings to Actual Client Using Data Reduction Solution:

Data Entered into the LMG Group Data Reduction Tool	675 Gigabytes
Percentage of Data Reduced from the Master Data Set	Approximately 26%
Total Data to be Processed in the Processing Solution	500 Gigabytes
Total Data Removed from the Master Data Set After the Data Reduction Solution	175 Gigabytes
175 Gigabytes of Data Priced at \$400.00 per Gigabyte	Total Savings = \$470,000.00
